

Revolutionary micro-current technology with Dynamic Lift_(TM) and LED Light Therapy

1 CLEANSE
prepare the skin for moisture testing: skin must be clean and dry

2 MOISTURE TEST
the level of hydration helps the therapist analyse the condition of the skin. Moisture levels are rated from low to high

3 APPLY
micro current gel acts as a conductor, allowing the micro current to penetrate deeper into the skin

4 LIFTING
involves several movements to work different parts of the face (neck and eye), giving the ultimate muscle lift
time: 30-45 min

5 APPLY MASK
biological derma mask to be applied after gel is removed. Micro currents help the mask's active ingredients penetrate deep into the skin
time: 10-20 min

6 LUMO LED LIGHT
proven, non-invasive facelift therapy. Absorbed using four types of light.
time: up to 20 min

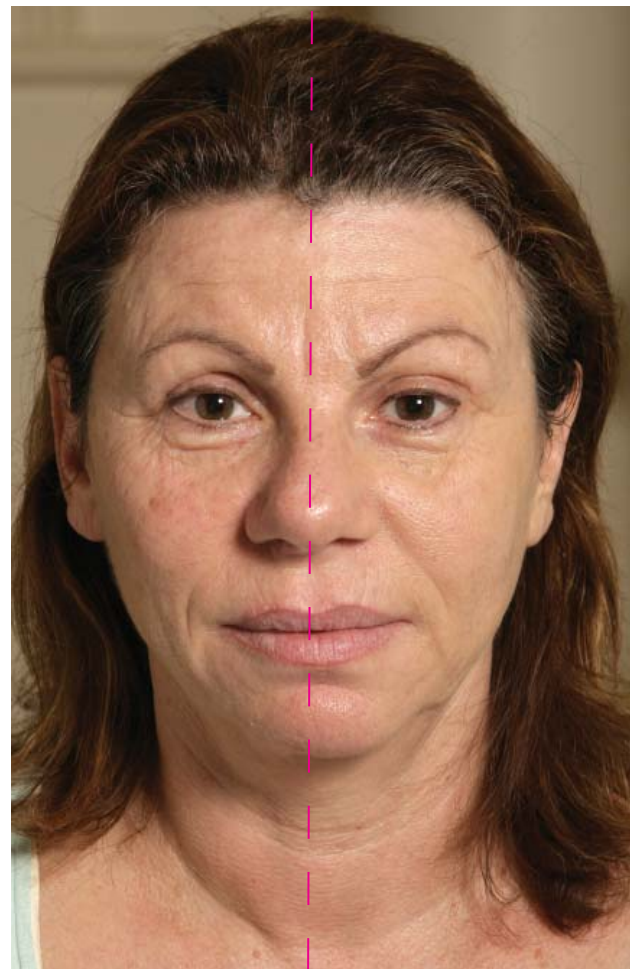

- Red energises and promotes skin circulation
- Green enhances facial muscle tone and fullness
- Yellow treats saggy skin
- Violet provides overall healing for damaged skin

7 STIMULATE
lymphatic system or muscles, depending skin's condition
time: 15-20 min

8 APPLY
moisture cream to leave skin looking lifted, younger and glowing.

Before Results after one 1/2 hour treatment (Age 59) After
